

Living in a rural area, I greatly benefit from listening to satellite radio and its content. Radio content is greatly limited in our area. My work causes me to travel a great deal and I have been looking forward to the traffic and weather channels. This is a subscription service that I gladly pay for and do not wish to see its content limited.

I understand that the National Association of Broadcasters are looking out for its members. However, I believe that competition, freedom of information, and my right to pursue happiness should not be limited by the government. Please reject the NAB's petition 04-160. Thanks for all of your hard work.
